(54) Title: INTEGRATED OPTICAL DEVICE

(57) Abstract: An integrated optical device comprises a first and a second integrated waveguides (201, 203) arranged so as to be in optical coupling relationship in a first and a second spaced-apart coupling regions (205, 207), and having respective optically uncoupled waveguide sections (209, 211) in between the first and second coupling regions. A first and a second modulated refractive index structures (223, 225) are provided, each one formed along a respective uncoupled waveguide section; the modulated refractive index structures comprises each at least one pair of regions (403, 401) of mutually different refractive index, adjacent to each other along the respective uncoupled waveguide section. The regions of mutually different refractive index comprise a portion (403) of the respective uncoupled waveguide section and a gap (401) formed in the uncoupled waveguide section, the refractive indexes of the regions differing from each other of at least approximately 1.5 %. The device can be exploited to form optical multiplexers/demultiplexers, particularly adapted to the use in wavelength division multiplexing optical communications.

INTERNATIONAL SEARCH REPORT

International Application No

PCT/EP 02/10902

A. CLASSIFICATION OF SUBJECT MATTER  
IPC 7 G02B6/293 G02B6/124

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 G02B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

EPO-Internal

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

☒ Patent family members are listed in annex.

\* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*G\* document member of the same patent family
